

The driver-friendly, super-sturdy RX™ Ramp reduces distribution costs by helping to reduce the number of injuries caused by slips and falls in wet and wintry conditions.

10

The trade name RX was derived from a physician's order to have RX™ Ramps installed on trucks, after injuries occurred, to prevent further injury. The RX™ Ramp has been successfully field tested at bakery and snack food distribution centers.

• **Ready to use in less than 15 seconds** •

Bustin's famous serrated aluminum grating provides the best slip-resistant surface in any weather conditions and helps minimize slips and falls.

• **No more jumping in and out of the truck** •

When delivering larger loads, drivers are encouraged to deploy this unique tri-fold ramp from a compartment under the truck and then use a hand truck to offload product.

• **Reduces driver back strain** •

Customers tell us that the 19° ramp angle greatly improves access while enhancing driver comfort and confidence. When the ramp is not in use, it slides easily out of the way, under the floor of the truck.

Detailed technical information is available upon request.

Part #	Width	Length	Ramp Weight	Total Weight
TFRC-100	23 1/2" inside 26" outside	108"	77 lbs	310 lbs

• **No rust, aluminum construction** • **Weight capacity: 600 lbs.** •
